Application No. 10/564,778  
Amdt. Dated: August 17, 2006

5

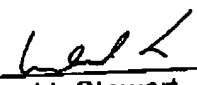

**REMARKS/ARGUMENTS**

In copending US Patent Application No. 10/892,124, a rejection was made under 35 USC 101 that claims 1 to 5 of that application claimed the same invention as that of claims 1 to 5 of this application. In order to obviate this rejection, the claims of this application have been converted, by this Voluntary Amendment, to method claims.

In addition, clerical errors in the wording of the claims noted in prior Application No. 10/892,124 have been corrected. Thus, the term "an enclosure" in claim 1 has been replaced by the term "a chamber" and the term "contaminator" in claim 5 has been replaced by the term "contaminants".

The status of this application as a US national phase filing under 35 USC 371 has been added to page 1.

Respectfully submitted,
